

OUR FILMS DELIVER

Clearpak has long been recognized as the premier company for quality, performance, and service, and we are proud to offer an outstanding portfolio of packaging products that meet our customers' sustainability needs.

SUSTAINABILITY IS KEY TO OUR FUTURE

Sustainability is not only good for the planet, it makes good business sense. It requires an all-encompassing commitment to doing business in ways that are considerate of the environment and the neighbourhoods where we live, work, and raise our families.

EMBEDDING SUSTAINABILITY IN OUR COMPANY CULTURE

As a leading global manufacturer of quality folding cartons for packaging and printing/specialty applications, we embrace sustainability and believe that sustainable business practices are essential to the well-being of future generations. Our sustainability commitment covers all three components of sustainability – environmental protection, social responsibility and economic development.

SUSTAINABILITY IS NOT A ONE-SIZE-FITS-ALL PROPOSITION

We believe in offering customers the broadest range of high-performance materials to meet their requirements for

- optimum product integrity
- environmental responsibility
- reasonable cost

DEDICATED TO SUSTAINABLE BUSINESS PRACTICES

As a conscientious steward of our environment, Clearpak applies the best available techniques and practices, we source materials responsibly, minimize resource depletion, and optimize process efficiency. Responsible management ensures the lowest possible emissions, energy use, wastewater, and waste material. Our employees work in a safe and secure environment, and we offer opportunities for skill development and advancement. We are committed to maintaining the highest standards of business conduct and corporate governance practices.

INNOVATING TO MEET MARKET NEEDS

We believe it is our obligation to drive sustainability practices in the packaging industry. That's why we will always innovate to meet market needs and continuously improve manufacturing excellence. Our full range of specially formulated films includes:

- materials that minimize energy, water consumption and CO2 emissions
- recycled content that helps conserve resources, minimize energy and CO2 and reduce waste materials to landfill
- renewable content to help minimize fossil fuel depletion
- resins suitable for down-gauging that create savings on transportation and material costs and reduce environmental impact
- resins compatible with existing recycling streams
